

Elyria & Hodge Foundry

- Elyria & Hodge (EHF) have been industrial staples in the foundry industry for 126 and 119 years respectively.
- EHF currently employs over 360 skilled union and non-union personnel.
- EHF one of the largest “job shop” foundry groups in North America.
- Hodge is the only Foundry still in production in North America, capable of producing ductile iron castings up to 220,000 pounds.
- In all, EHF have the capability to pour up to 425,000 pounds daily.
- EHF are integral suppliers to the industry providing a breadth of services unique to the industry.

Elyria & Hodge Foundry

EHF produced over 80,000,000 pounds of ductile iron castings for several OEM's and employed over 90 people at one time for wind power alone.

2.5 MW:

Nacelles, Hubs, Upper Housings, Lower Housings, Torque Arms, Planetary Carriers and numerous small castings.

1.5 MW:

Hubs, Upper Housings, Lower Housings, Torque Arms and Planetary Carriers.

Elyria & Hodge Foundry

Large Foundry Challenges & Opportunities:

- 1) Market volatility and commitment
- 2) Low-cost Countries - competition
- 3) Skilled and unskilled labor availability
- 4) Foundry ownership and investment
- 5) Casting completion – Machining
- 6) Freight availability & costs
- 7) Silica sand and potential replacement
